### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, and 20-21 are drawn to a method for applying wear reducing material to a tool by a laser, classified in class 219, subclass 121.64.
  - II. Claim 19, drawn to a tool joint to which a wear-reducing material has been applied, classified in class 175, subclass 320.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions applying wear reducing material to a tool by a laser and drawn to a tool joint to which a wear-reducing material has been applied are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, such as using an electron beam to apply wear reducing material to a tool joint. (Product-by-process claims are defined by the final product and not by the process steps used to make the product).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1725

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
